December 23, 1996

Ben Stott
Meadow, Utah 84644

Dear Mr. Stott:

The State Engineers office in review of change application 67-190 (a17818) field reviewed some of the acres involved in this change in Section 33, T20S, R5W SLBM. During this review we looked at acreage under the Pahvant Development Company and the water rights associated with the land. It appeared that more acreage was irrigated this past year that there is water rights for. Also, we found a couple of wells that appear to have been in operation with no water rights associated with them. The first of these wells is located in Section 33, T20S, R5W SLBM. The water right from this well was changed by Clay Cummings to another well and place of use. The second well is located in Section 27, T20S, R5W SLBM next to one of the Pavhvant Development Company wells. There is no water right of record for this well. It looked like it was plumbed into a new main line for a new wheel line with the Pavhvant Development Company wells.

After our field review we reviewed the water right records to make a summary of the rights appurtenant to your farm. The following is a summary of the water rights:

<u>Water Right #</u>	<u>Flow</u>	<u>Acres</u>	<u>Sole Supply</u>
67-129	1.335	196.5	40.0
67-130	1.335	196.5	40.0
<u>67-145</u>	<u>0.82</u>	<u>190.5</u>	<u>84.4</u>

Total 3.49 164.4acres

All three of these rights are from the same well in Section 28, T20S, R5W SLBM and are supplemental to each other.

67-190	5.0	1,386.1	293.33
--------	-----	---------	--------

This is the Pavhvant Development Company water right. I do not know how much of this right is yours. Your percentage of ownership would tell us how many of the 293.33 acres you have a right to irrigate. Assuming you have 40% you then would have the right to

irrigate 117.33 acres under this right.

67-653

3.67cfs 155.6

155.6

This water right is for two wells in Section 24, T20S, R5W SLBM.

These water rights total enough water to irrigate 437.33 acres of land. And can only divert water from the wells described under each of the above described water rights.

If you have any questions regarding your water rights and their limitations please feel welcome to contact this office.

Sincerely,

A handwritten signature in cursive script, appearing to read "Kirk Forbush", with a long horizontal flourish extending to the right.

Kirk Forbush, P.E.
Regional Engineer
